**NOTICE OF MARINE OPERATIONS: UPDATE****South**

Works are expected to be undertaken on or around 28 November 2020 for the scheduled service of the Start Bay wave buoy. Licence position as below:

Station	Latitude	Longitude
Start Bay	50°17.5343'N	03°36.9889'W

With reference to the Start Bay wave monitoring buoy (Figure 1), part of the Regional Coastal Monitoring Wave Buoy Network, Fugro kindly requests mariners:

- Give 200 m minimum clearance from the buoy;
- Refrain from deploying any fishing gear in the vicinity to reduce the danger of entanglement and equipment loss;
- Do not moor to any part of the deployed mooring or buoy.

The buoy is moored using a rotational, and therefore tidally influenced mooring design, with two 15 m rubber bungees close to the surface (Figure 2). Mariners are requested to not pass within 200m to the buoy, to avoid the danger of vessel entanglement or mooring damage.

The wave buoy is 0.9 m in diameter and is painted yellow. The buoy has a yellow flashing LED light on top of a 2 m long HF aerial transmitter (flashing 5 times every 20 seconds). In addition, the buoy is equipped with radar reflectors. The words NO MOORING and Channel Coastal Observatory are displayed on the buoy.

If you have any questions or comments, please contact Fugro's Coastal Oceanography department on:

By email: [coastal.oceanography@fugro.com](mailto:coastal.oceanography@fugro.com) , or by phone: 02392 205 510

In emergencies please contact Fugro's Coastal Oceanography department on:

By email: [fugroemumetocan@gmail.com](mailto:fugroemumetocan@gmail.com) , or by phone: 07810 697 357

Please forward on to any relevant parties.
