## D&S IFCA Publishes its Annual Report 2023/2024

Read about the achievements of D&S IFCA set out in its Annual Report 2023/2024

### Background

D&S IFCA has the largest of the ten IFCAs' districts and has two separate coastlines. The area of the District is 4,522km<sup>2</sup> and is defined in the Statutory Instrument (2010 No. 2212). D&S IFCA's District includes the areas of Devon, Somerset, and Gloucestershire County Councils; Bristol and Plymouth City Councils; North Somerset and South Gloucestershire Councils and all adjacent waters out to six nautical miles offshore or the median line in the Bristol Channel with Wales.

The fisheries and marine environment are markedly different on the two coasts. The north coast of the District from Somerset to the east up the Severn estuary is characterised by significant tidal ranges, large amounts of suspended sediment, and extensive mudflat habitats that support a range of different types of net fisheries and significant recreational angling. The Devon coasts and estuaries in contrast are known for their diverse fisheries including significant pot fisheries, the largest mobile fishing fleet operating in any IFCA District and an extensive network of Marine Protected Areas.

The Full Authority is comprised of 30 Members drawn from relevant Local Authorities (Councillors), General Members (appointed to the Authority by the Marine Management Organisation (MMO) and Statutory Appointees representing the Environment Agency (EA) and Natural England (NE).

D&S IFCA is funded primarily from Central Government, with additional contributions from the eight relevant funding Local Authorities.

### Annual Report 2023/2024

As specified in the Marine and Coastal Access Act 2009, D&S IFCA must publish an Annual Report.

The Annual Report can be read [here](#).

The Report details the work undertaken in FY 2023/24 and provides a summary of progress and achievements as measured against objectives set in the 2023/43 Annual Plan (the Authority's goals) and as measured against the national IFCA success criteria and high-level objectives (outcomes).

A team of 12 Officers delivered the Annual Plan. The Annual Report reflects that the priority workstreams were those that received national funding.

Professor Mike Williams, Chair of the Authority said....

*"This report covers the thirteenth year of operations and provides a summary account and review of the Authority's achievements during the financial year 2023/2024.*

*In my seventh year as Chair of the Authority, I, with the support of the Chief Officer, have continued to address the inadequate funding structure of the Authority by engaging with Defra and D&S IFCA's Funding Authorities. Regrettably, progress can only be described as glacial, but the process continues. The task of attempting to resolve the funding crisis was itself a task listed within the Annual Plan for 2023/2024.*

*D&S IFCA has the largest District of all IFCAs with 4,522 km<sup>2</sup> of sea area and two separate coasts to manage. However, D&S IFCA operates on the lowest mainland IFCA Revenue Budget of £914,600, and from June 2023 had only 11 full-time Officers and one part-time Officer to undertake all of the Authority's governance, research and enforcement work. This resourcing is demonstrably inadequate.*

*The Annual Report provides the platform to report on work undertaken as part of the Annual Plan for 2023/2024. There are some significant achievements; however, due to its limited resources, D&S IFCA is unable to deliver all of its own vision as an organisation or all of its mandatory statutory functions. There are unfortunately many tasks that D&S IFCA has not been able to plan for, and undertake, during 2023/2024.*

*Despite the funding challenges that I have outlined, I hope that this Annual Report will help all readers to gain a better understanding of the excellent work that is being delivered by D&S IFCA and the value this organisation has, as it continues to strive to meet its statutory duties and the expectations of all stakeholders".*

### **More Information**

A website page has been developed to display all recent Annual Plans and Annual Reports. The website page "Annual Business Plans & Reports" can be viewed [here](#).
