

DSIFCA 16_25 – Trawling within MPA

Between 2nd July 2025 and 5th July 2025, D&S IFCA officers investigated a report of a potential spatial incursion by a mobile gear vessel within a restricted area of the District.

An interrogation of UK VMS hub database indicated no evidence of fishing activity by the named vessel during June or early July. Further enquiries were conducted, however no offences were identified.
